Work Experience

Software Engineer, Morgan Stanley

Apr 2021 – present

- Undergone a 15-week intensive technical training program covering a wide variety of technology and tools with distinctive performance
- Developed and improved 3+ applications in a Customer Relationship Management (CRM) system facilitating over 20,000 financial advisors and clients with their daily operations in the firm

Student Software Developer, Berea College

May 2018 – Nov 2020

- Built an online student fee payment application under 4 weeks and added an extra layer of security using end-to-end encryption, saving at least 2 hours of daily work time of the staff from in-person payments
- Developed 10+ applications during 2+ years of active work resulting in an improved user experience and convenience for 1600+ students and 130+ faculty
- Automated data migration process from one database to another, reducing daily operations by 1 hour

Software Engineering Intern, Morgan Stanley

Jun 2020 – Aug 2020

- Developed a Notes dialog application in a Customer Relationship Management (CRM) system enabling over 20,000 financial advisors to comply with Regulation Best Interest policy passed by the Securities and Exchange Commission
- Contributed to several inside projects using Angular and C#.NET

Technical Program Manager (TPM), CodePath.org

Dec 2019 – May 2020

- Instructed a CodePath Android University bootcamp offered at Berea College
- Managed a team of TPMs to coordinate weekly roles and manage a class of 20+ students
- Taught how to develop functional and deployable Android applications resulting in 2 teams of students winning “Best Overall App” and “Best Product Idea” awards on Demo Day of CodePath.org

Software Engineering Intern, Red Hat | IBM

May 2019 – Aug 2019

- Developed scripts for an automated data upload to host inventory and for an automated testing of the product, reducing testing time by almost 50%
- Enhanced the project installer for RHEL 8 using Podman, adding more options and convenience for project users
- Implemented features in Python (including unit and integration tests) and contributed them upstream in an Agile environment using bi-weekly sprints

Open Source Contributions

- **Ansible** – added extra features to Ansible Galaxy, such as adding a sorting functionality for saved repositories, and fixed several issues on Ansible Workshops. [**Django, Angular, JavaScript, HTML, CSS**]
- **Runestone Academy** – co-authored the books "C++ for Python Programmers" and "Data Structures and Algorithms with C++" which are available at the Runestone Academy. [**Python, C++, Git, Java**]

Projects

(details at <https://github.com/Dostonbek1>)

- **Covid Tracker** – developed an Android app used to track COVID-19 cases in the US, with a Robinhood app style graphics and charts. [**Android, Kotlin, Retrofit, Robinhood/Spark**]
- **Movie Tray** – developed an Android mobile app that lets users discover newly released movies, using TMDb API, available on **Google Play**. [**Android, Java, TMDb API**]
- **Beruny Academy** – co-founded one of the largest online education platforms in Uzbekistan that offers free tutorials on learning English language, web development and computer programming to over 4,000 students. More at **beruny.com**.
- **Deep Learner - RevolutionUC Hackathon** – in a team of 4 developed a desktop application used to build Artificial Neural Networks using solely GUI, without having to write a single line of code. [**Python, R, Tkinter**]
- **Color Razor - Berea Local Hack Day** – developed a desktop application under 8 hours used for face and eye detection as well as for styling pictures. [**Python, Tkinter, OpenCV, Machine Learning**]

Skills

- **Programming Languages:** Python, C++, Java, JavaScript
- **Web Technologies:** Angular, Flask, Django, HTML, CSS, C#.NET
- **Other:** Android, Linux, Bash, SQL, Docker, Git

Education

Berea College, Berea, KY

Aug 2017 – Dec 2020

- **B.A. Computer Science GPA:** 3.61
- **Relevant Courses:** Software Design and Implementation, Data Structures, Theory of Computation, Networking, Data Analytics, Combinatorics, Linear Algebra, Calculus I & II & III, Differential Equations, Numerical Analysis
- **Scholarships/Awards:** 4-year Full Scholarship, Dean's List (5x)
